

## Ideation Phase

### Define the Problem Statements

Date	5 November 2022
Team ID	PNT2022TMID32512
Project Name	Project – Digital Naturalist – AI enabled tool for Biodiversity Researchers
Maximum Marks	2 Marks

#### Problem Statement:

##### PROBLEM -1:

I am  Ornithologist	I'm trying to  conduct a research on different species of birds	But  I could not find a proper site for my work	Because  Most of the sites are not providing proper information	Which makes me feel  outraged
---------------------------	---	---	---	-------------------------------------

##### PROBLEM -2:

I am  Marine biologist	I'm trying to  Identify unnamed sea species	But  no one helped me to figure out them	Because  we don't have a proper database	Which makes me feel  frustrated
------------------------------	---	--	--	---------------------------------------

##### PROBLEM -3:

I am  travel freak	I'm trying to  create a vlog on cryptids	But  I need some resources to publish them in my social media	Because  Even Wikipedia have no facts on cryptids	Which makes me feel  exhausted
--------------------------	--	---	---	--------------------------------------

##### PROBLEM -4:

I am  Farmer	I'm trying to  eradicate weeds and pest in my farms using technology	But  I could not find a proper tool to identify the pests	Because  The cost of setup is more and data availability is less	Which makes me feel  disturbed
--------------------	--	---	--	--------------------------------------

##### PROBLEM -5:

I am  biologist	I'm trying to  conduct a research on different species of plants	But  I am not able to classify the plants based on their nature	Because  they all look similar and there is a redundancy of data	Which makes me feel  vex
-----------------------	--	---	--	--------------------------------
